ellenex

IIoT for Action

ellenex

Industrial low power IoT

At ellenex, we believe industrial IoT solutions need to be **modular**, **integratable** and **application centric** to make them scalable and profitable for customers. ellenex IoT framework designed to address these needs.

- **Simplified**

- **Reliable IoT solutions**

- **Designed to reduce operational costs**

our differentiator

more than 2 decades of experience of working with industries, led us to offer solutions, addresses real challenges in the industry.

low power

end to end

composable

network agnostic

industry focused

integratable

ellenex

our complete solution

we offer end to end solution, but not locked to any network, platform or system.

Manufacture industrial sensors

Design integrated interfaces

Offer microservice platform

our sensors ...

We are manufacturing low power sensors in 5 categories and more than 80 variations.

We manufacture PRESSURE, LEVEL and TEMPERATURE sensors

And offer solutions for load, strain, flow, water quality (conductivity, turbidity, salinity, pH, dissolved oxygen) and air quality
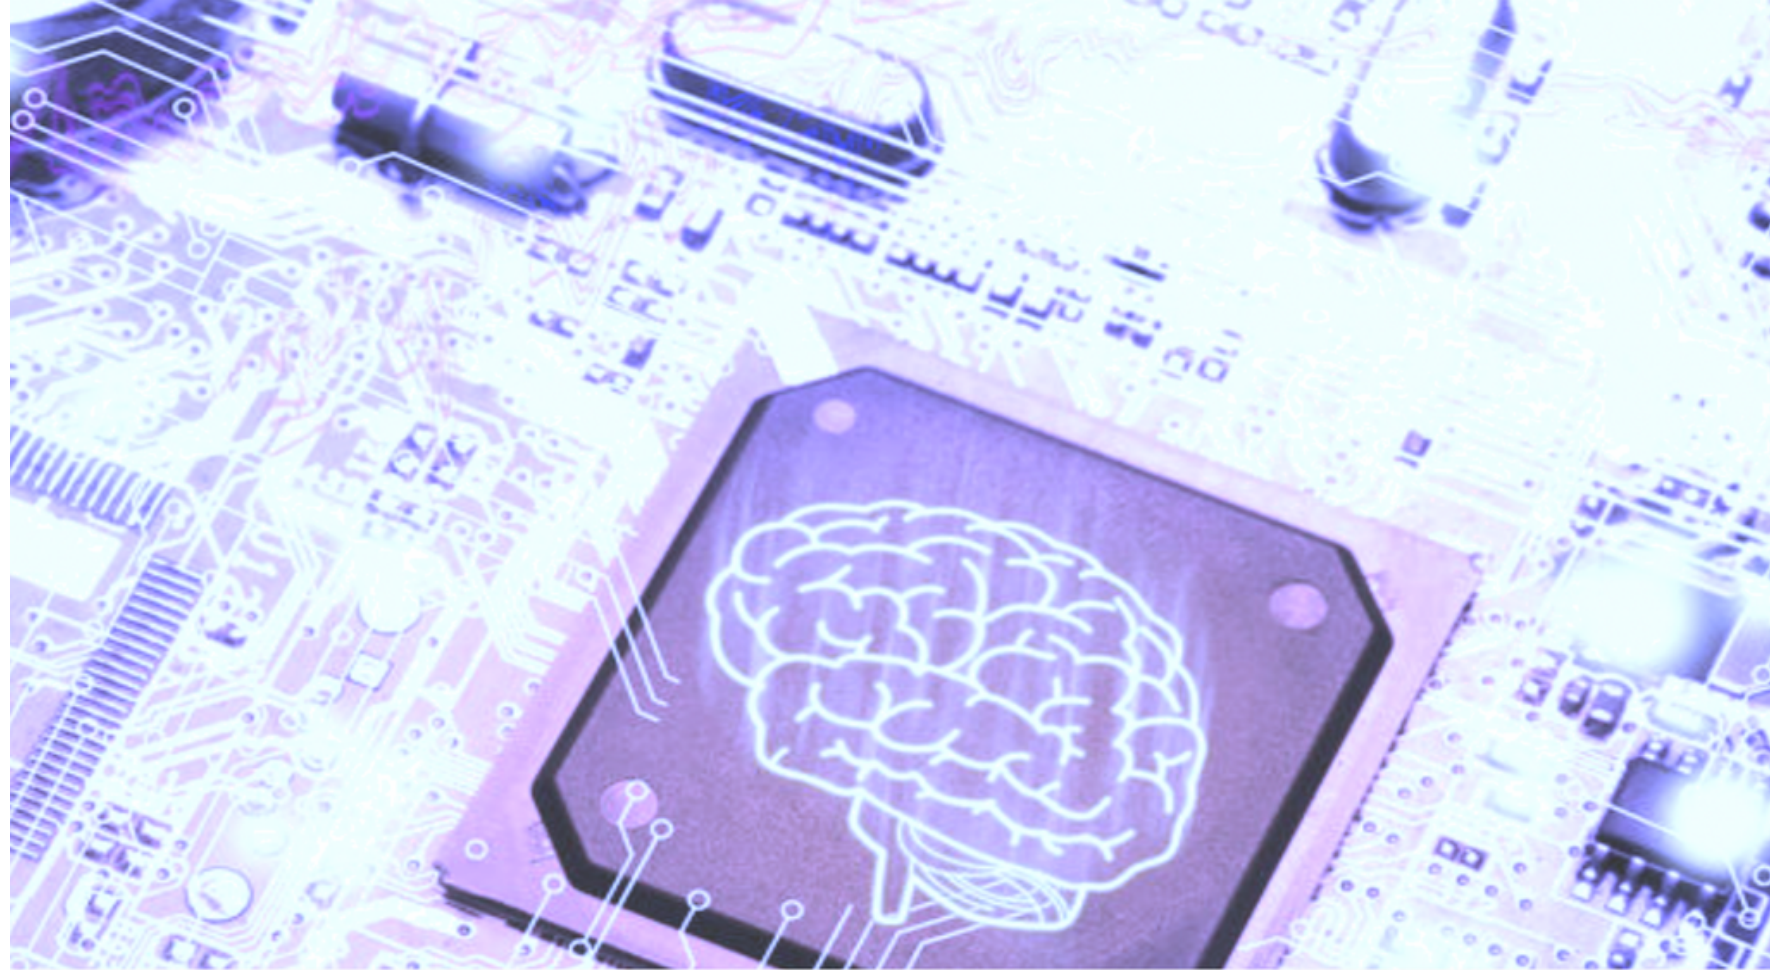

our electronic interfaces ...

I2C
mV
mV/V
Pulse
RS485
PT1000
4-20mA
0-5/ 0-10V
Dry contact

Multi-channel

Custom design

| NB-IoT | SATELLITE | LoRaWAN | SIGFOX | WIREPAS | Wi-Fi |

our software platform ...

Designed for enterprise
Role-based access control
API-first
Serverless
Multi-tenant
Forecasting API
Device inventory
Simple and scalable
Custom workflow engine
Custom device parameters
Multi-channel alerting

our global support

We are offering professional support to our partners and customers in more than 50 countries through our technical and sales channels to be sure they are getting the ultimate benefit from our solutions and technologies.

our focused industries

we offer application centric solutions …

agriculture & farming

water and waste water

oil & gas

HVAC & building

logistics & delivery

construction & mining
